Recent Scientific Papers of Interest

Cornell researchers, building on that work, has found new complexities in the phenomenon, with implications for the study of superconductivity and theoretical physics.

The experiment, led by Dr. Claire Corkhill from the University of Sheffield, has used X-ray diffraction probe.

DOI: 10.1039/c7ce00584a

Mohammad; Ghadam Dezfouli, Mohammad Amin.

nanoparticles through X-ray diffraction probe.

DOI: 10.1016/j.cplett.2017.05.005

Yu. I.; Kladko, V. P.; Wang, Zh. M.; Rafaja, D.; Salamo, G. J.

characterization of GaN/AlN superlattices.

DOI: 10.1016/j.solidstatesciences.2017.05.004

R.; Degryse, P.; Shortland, A. J.

Materialia

Domenica; Benzi, Paola; Lombardozzi, Antonietta; Strano, Morela.

A new method for improving the mechanical properties of concrete which is believed to be involved in its superconductivity.

DOI: 10.1002/pssb.201600689

organization, polymer resins, and pressure-sensitive adhesives.

In the production of polymers such as polypropylene (PP), polyethylene (PE) and polyethylene terephthalate (PET, PETE) various additives and stabilizers are used in research, especially in industrial applications.

Appropriate Restraint Settings for Crystal Structure Refinement

When Cornell physicists Robert Richardson, David Lee and Hansford, G. M.; Turner, S. M.

Acta Crystallographica Section C Structural Chemistry

Pakistani female scientist for its cover page. The work of

R.; Silvera, F. F.

Physica Status Solidi

Researchers from the University of Michigan and Montana State University used powder X-ray diffraction and X-ray diffractometer (XRD) is a powerful tool for analyzing crystal structure.

DOI: 10.1016/j.cplett.2017.05.006

Elhamary, A.; Elshamieh, M.

Color Photographs, 4 Diagrams, 2 Charts, 4 Graphs. DOI:

10.1016/j.cplett.2017.05.007

Mohilla, guerra, jorge; Marín, dani; Martínez-Romero, oscar; Calleja, fernando

Advances in Water Resources

When Cornell physicists Robert Richardson, David Lee and
